

Testimonial for Precise Digital Solutions

Mr. Johan Segring
President and Founder
Precise Digital Solutions

Dear Johan,

After having personally worked with you for the past eight years, I would like to offer my endorsement of your incredible capabilities and how you have been, and will continue to be, vital to the success of FlightWorks. I am grateful for your service on my leadership team and you continuously demonstrated the highest levels of professionalism, ingenuity, and dedication to unique solutions. I believe you will be an asset to any organization.

In my 25 year aviation career I have never met someone that better understands the intricacies of our business. More importantly, you understand how to turn complex data into information that substantially improved the bottom line of our company. Whenever a project of substantial scope and size was considered, you were the one selected to lead those efforts for one reason – there is no one better than you at project management. You also understand critical timelines, budget control and how to motivate a team to achieve their goals.

There is no one else that I would have chosen to lead our selection and implementation of our paperless cockpit initiative, new accounting system, flight dispatch improvements, human resources management software, and so many more projects that improved efficiency and profitability of the company. Your knowledge and experience of developing, integrating, and implementing solutions with systems such as FOS, Airwatch, FlightBridge, Intacct, Sales Force, and SharePoint sets you on a higher plane than anyone I have seen in the industry.

FlightWorks is a dedicated client of Precise Digital Solutions and I recommend you without hesitation.

Sincerely,

A handwritten signature in purple ink that reads "Daniel T. Lucey".

Daniel Lucey
President
FlightWorks, Inc.
